## Our Company

A Company founded on know-how

We are both innovative and open-minded.

We understand the market and as a result we are well positioned to help you deliver what your customers want.

We partner with our clients for the best results.

With the cutting-edge technology at our disposal, we can develop bespoke products that are perfectly suited to your market. We'll work with you to create an innovative solution that's right for you and your customers.

Our automotive window films have been designed with the installer in mind. All our films from well

# ROXXN

under heat, and our adhesives are formulated to go down on the dot matrix. Shades available closely mirror factory privacy glass, providing a finish that looks perfect for years to come.

Our skin care window films carry the US Skin Cancer Foundation seal of recommendation.

**The result clear to see - the highest quality window and paint protection films.**

## Nano Ceramic Film

---

### 10 | 35 | 60

Nano technology is an application of semi-transparent, nano-sized particles applied to the PET and laminated into the finished product. Provides enhanced performance, excellent color stability, and clarity.

- ✓ Infrared heat absorption
- ✓ Solar heat rejection
- ✓ No signal blocking
